FINANCIAL SECURITY

Our online payment solutions are carried out using a 'payment gateway' (e.g. Stripe) which is a direct connection to a payment service provided by a bank. This means that when you input card data into the payment page, you are communicating directly with the bank and the bank passes your payment to us, this means that your payment card information is handled by the bank and not processed or held by us.

Stripe uses a SSL (Secure Sockets Layer) protocol for encryption. Most web browsers (Microsoft Explorer, Mozilla Firefox, Safari, Google Chrome etc) support SSL. The link between your web browser and the server is secure if your web browser displays a small padlock or key symbol somewhere in the frame, or the address bar shows a web address beginning https:// (rather than http://).
