

THE EXPERIENCE OF A COMMERCIAL CONSERVATION PRACTICE IN TACKLING THEIR OWN NET ZERO PATHWAY WITH JULIAN BICKERSTETH

In this session, Julian Bickersteth speaks about his experience setting up Net Zero within his own conservation business, International Conservation Services Limited. Julian shows how they have been changing their work regarding energy and water consumption, supplies, and others. He also briefly explains about assessing carbon emissions and aiming to be carbon neutral by 2028.

Session Structure

Minute 0: Introduction to the International Conservation Services Limited and how they are working through Net Zero

1'20": Utilities, energy consumption and mitigation
